# MUSTAFA MUHAMMED

## QA-TEST ENGINEER

## PROFILE

- Full Stack Developer skilled in JavaScript, React, Django, and REST APIs, finalising a React-Django project.
- Software Testing Engineer with manual and automated testing experience.
- Mechanical Engineer with expertise in design & development.

## WORK EXPERIENCE

### PAYUCA GmbH

QA-Test Engineer

MAR 2022 - PRESENT

- Sole QA Engineer, independently managing testing efforts and prioritising tasks to ensure a seamless user experience.
- Conducted manual testing for web and mobile applications, ensuring product quality and reliability.
- Provided clear bug reports and collaborated with developers to reproduce and resolve issues efficiently.
- Worked closely with the UX team, offering insights to enhance user experience and usability.
- Reviewed feature documents and provided valuable feedback to product owners and stakeholders.
- (Previously initiated automation using Appium & TestNG for regression testing and Selenium WebDriver, WebDriverIO (Java) for mobile automation, but automation was discontinued due to limited QA resources at the end of 2022.)

### UNITED CODER LLC

Software Development Engineer in Test JUL 2020 - JUL 2021

- Developed a Java-based Test Automation Framework using Selenium, TestNG, Cucumber, and SQL.
- Performed defect tracking, regression testing, and backend validation for software stability.
- Applied best practices in manual and automated testing to ensure high-quality deliverables.

## TOOLS & TECHNOLOGIES

- Testing Tools: Selenium, TestNG, Cucumber, JMeter, Postman, REST Assured
- Programming & Scripting: Java, Python, JavaScript
- Databases: MySQL, PostgreSQL, SQLite
- CI/CD & DevOps: Jenkins
- Version Control: Git, GitHub
- Bug Tracking & Test Management: JIRA
- Frameworks & Libraries: Django, React, Bootstrap
